February 11, 2013

Dear Prof. Dr. Sanjay Chordiya & **Mrs. Sushama Chordiya**

Please accept warm greetings and congratulations for the function organized on 7th Feb. 2013 for presentation of "**Suryadatta National Lifetime Achievement Award**" and "**Suryadatta National Awards 2013**".

Due to health problem, I am sorry I could not give full justice to the programme. I have also missed an opportunity to listen to the speeches of the eminent awardees.

Being part of your organization, I was hesitant to accept the award. However your love did not allow me to refuse the same. This programme also provided me an opportunity to meet several friends including Manindarjit Singh Bitta and others.

Love and affection of friends like you has always remained the strength in my life. I am sure that I will continue to receive the same in future.

I have my dream about Suryadatta Group of Institutes. Within few years, this Institute should be "**Harvard**" of India. Please try to fulfil my dream.

With warm regards and best wishes for Suryadatta Group of Institutes.

Yours sincerely,

Mohan Dharia

B.Sc.-CDS
(Cyber and Digital Science)

The B.Sc-CDS (Cyber and Digital Science) Program is a 3 year Bachelors Degree Program affiliated to the Savitribai Phule Pune University. The Program is designed to empower the student for immediate employment on passing out. It is a fine blend of Theory & Practical, with emphasis on Communication Skills and Interpersonal Skills.

Eligibility :

1. Higher secondary school certificate (10+2) with Science or its equivalent examination with English OR
2. Three year Diploma course from the board of technical education conducted by government of Maharashtra or its equivalent OR
3. Higher secondary school certificate (10+2) Science Examination with English and a vocational subject of +2 level (MCVC)

Beyond Curriculum:

The academic curriculum for Cyber & Digital Science is supplemented and enriched through multiple additional inputs, knowledge based learning in the form of guest lectures, seminars, conferences, symposiums, experiential learning in the form of field work, case studies – both live and old, hands on insights through projects with the industry and the surveillance agencies, assistantship with cyber lawyers and advocates, competitions & professional society activities. We also provide twenty modules every year in the form of workshop modules as additional inputs.

Why B. Sc. – Cyber & Digital Science?

The required skills are analytics, engineering, and software development, and also highly specialised functions such as intrusion detection (monitoring suspicious activity on the network), access management, risk auditing, cryptography, forensic sciences, and network security.

Even as cybercrimes get more complex, most available candidates have only the basic training and certifications. Companies, meanwhile, need people who can manage advanced technologies, take care of the transformation from legacy to new-age systems, and innovate. This programme attempts to bridge this gap and create domestic talent in this area.
